

EnviroAire™ Formaldehyde-free™ Duct Board

EnviroAire™ Duct Board. Quiet comfort comes with peace of mind.

EnviroAire™ Duct Board.

You want a healthy environment throughout your home. Comfortable, consistent temperatures from room to room. Lower energy costs. And the sheer comfort of listening to nothing but silence. Duct board replaces the inefficient bare sheet metal ducts common in older homes and improves the energy efficiency and comfort of your custom home. That's the quiet comfort delivered by EnviroAire™ Duct Board.

Precision comfort, from room to room.

EnviroAire Duct Board is designed to deliver warm or cool air with greater efficiency. You don't have to run to the thermostat to make adjustments. Your rooms stay at the temperature you select.

Lower energy costs.

Consistent temperatures, fewer adjustments, and less conditioned air loss than in sheet metal ducts all mean less energy consumption and lower utility bills.

Reduced noise.

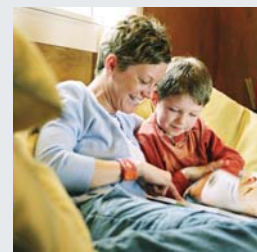

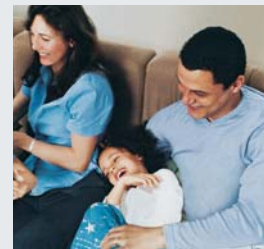

The outstanding acoustical qualities of EnviroAire Duct Board eliminate the "popping," vibrations, and equipment rumble typically associated with noisy metal duct systems. And unlike ordinary ductwork, EnviroAire Duct Board reduces the sounds of fans, appliances, TVs, and conversation from other rooms.

Assured product protection for everyone in your family.

For peace of mind around indoor air quality, EnviroAire Duct Board is made without formaldehyde. That's important for your family because the US Environmental Protection Agency (EPA) recommends that you minimize your overall exposure to formaldehyde. The California EPA similarly recommends you use building materials, including insulation, with no added formaldehyde. It also features our blue EnviroCoate™ Reinforced Coating System—an antimicrobial treatment that protects the product surface from the potential growth of bacteria, mold, and fungus. Enjoy quiet comfort and a healthy indoor environment.

Enjoy quiet comfort and a healthy indoor environment. Ask your builder to specify JM EnviroAire Duct Board throughout your home.
