**Product Enhancements for GlasKap® Cap Sheet Used in BUR Systems**  
Bituminous Roofing Systems

Johns Manville has enhanced its GlasKap (White) cap sheet used in hot-applied, built-up roofing systems. GlasKap is a mineral-surfaced, asphalt-coated, fiber glass cap sheet featuring low moisture absorption and excellent dimensional stability.

The cap sheet color is now whiter due to enhanced granule embedment. The packaging will also change from a wrapper to a tape in an effort to reduce waste.

Johns Manville does not recommend mixing the older GlasKap cap sheet product with the enhanced, whiter product due to the variation in the shades of white. A “Do Not Mix” label will be placed on all new product rolls for the next 60 days.

Be sure to contact your local JM sales representative or customer service advocate for pricing and lead times.
