Two SBS Heat-Weldable Products Added to JM Web Site

As the demand for heat-weldable products continues to increase, Johns Manville is excited to add two made-to-order, heat weldable products to the JM Web site.

DynaBase® HW: A fiber glass-reinforced mat, 90 mil base sheet that meets ASTM D 6163, Type 1, Grade S. The 1.5-square (150 ft²) roll is surfaced with sand on the top and a burn-off film on the bottom for ease of heat welding. This sheet can be substituted for DynaWeld™ Base in any JM specification and qualifies for up to a 20-year JM Peak Advantage® Guarantee.

DynaWeld Cap 250 FR: A polyester-reinforced mat (250 gram), 160 mil cap sheet that meets ASTM D 6164, Type 2, Grade G. The one-square (100 ft²) mineral-surfaced roll has a burn-off film on the bottom for ease of heat welding. This sheet can be substituted for DynaWeld Cap FR in any JM specification and also qualifies for a 20- year guarantee. DynaWeld Cap 250 FR is particularly effective in areas concerned with impact resistance.

Made-to-order products may have up to a two-week lead time from order placement and ship from Macon Georgia, Plattsburgh New York and South Gate California. This stocking plan will be reviewed as demand changes.

These SBS products have a variety of FM and UL approvals. For specific questions, please contact our JM Technical Services at (800) 922-5922.
