**TopGard® 4000 and TopGard 5000
 Now Available in Cool Roof Tan**

For years the only color that met Title 24 Cool Roof Standards for reflectivity, in the Building Standards Section of the California Code of Regulations, was white. For aesthetic reasons, white is not always the most desirable color. Now customers have an alternative to white that meets Title 24 Cool Roof standards for reflectivity.

Introducing TopGard 4000 Tan and TopGard 5000 Tan.

TopGard 4000 Tan is a 100% acrylic elastomeric roof coating. It is ideal for warmer climates where temperatures do not drop below 0° F (-18° C). It is UL approved and meets all ASTM 6083 specifications except cold temperature flexibility.

TopGard 5000 Tan is 100% acrylic elastomeric roof coating. It is ideal for colder climates where temperatures may drop below 0° F (-18° C). It is FM and UL approved and meets all ASTM 6083 specifications.
