**Johns Manville Introduces Improved TPO Low VOC Membrane Adhesive
Roofing Systems — Single Ply**

Johns Manville has improved our Low VOC Membrane Adhesive, which promotes improved performance on vertical substrates. This upgraded adhesive demonstrates Johns Manville's commitment to TPO and signifies improved product capability in our single ply offering.

JM TPO Low VOC Membrane Adhesive is currently available in our Tracy, Hazleton, and Scottsboro facilities. This Low VOC option is approved for use in FM and select UL approvals. In addition, it is a key product when considering more stringent VOC regulations that are increasing nationwide.

The JM TPO Low VOC Membrane Adhesive is available in 5 gallon pails and may be ordered through existing channels using the current SKU #70000292.

Thank you very much for your support and help as we continue to make the best TPO product on the market even better!
