Johns Manville Enhances JM TPO and PVC Universal Corners

Johns Manville is pleased to announce design and function improvements to one of the most popular accessories on a single ply roof. Based on market and customer feedback, our waffle-style design has been modified to include more waves in the diameter, thus giving the applicator more material to work with when completing a detail. The new design allows greater flexibility for both inside and outside corner applications.

A 6" diameter and an optimized waffle pattern should increase installation efficiency and adaptability at critical detail points.

Diameter: 6" (15.2 cm) diameter

Colors: White, sandstone (tan), grey

Packaging: 20/box

Stocking Locations: Scottsboro, Alabama - TPO
Hazle Township, Pennsylvania - TPO & PVC
Tracy, California - TPO & PVC

TPO SKU: 70001601 - White
70001603 - Tan
70001604 - Grey

PVC SKU: 70001598 - White
70001599 - Sandstone
70001600 - Grey

Johns Manville is dedicated to developing our thermoplastic offering to meet the growing needs of our valued customers. We are in the process of changing all of our technical data sheets, sample cards, and product labels to reflect these changes.
