Distribution: External

**Update to Cornwall Manufacturing Facility Production Outage  
Revised Dates: April 8 – 25, 2011**

Due to business conditions, the Cornwall manufacturing facility production outage has been pushed back to April. The outage is now planned to begin on April 8 and end on April 25.

Shipping will remain open during this time and the outage should not affect product availability out of the Cornwall facility.

Non-stocked items will be temporarily sourced from a different JM location. However, product will still be available for pickup at the Cornwall facility.

Please be sure to contact your customer service advocate with any questions.
