# JM PVC Penetration Pan

### Description

JM PVC Penetration Pans are a one-piece molded unit with a square base flange. The penetration pan is slit on one side to allow for positioning around objects to be flashed. A welding tab is included to seal the penetration pan once installed.

The JM PVC Penetration Pan is used to seal uneven penetrations through the membrane that are difficult to flash.

### Color

Grey

### Physical Properties

Thickness ..... 0.125" (3.18 mm)
